AMERICA FOR AMERICANS

McKINLEY AND WILSON ABROAD.

In 1890 William McKinley was burned in effigy in the English manufacturing city of Sheffield, but in 1914 William Wilson was dined and vined in London because he is the author of a Free-trade Tariff Bill. These are significant facts.

THE SILVER PROBLEM.

Commercial Gazette.

Farmer Anderson has two thousand bushels of wheat.

Mr. Jones has a thousand dollars worth of silver bullion.

Mr. Anderson's wheat is worth in the market \$1,000.

So is Mr. Jones's silver bullion.

Mr. Jones goes to Philadelphia, takes his silver to the Mint and has it coined into two thousand nice, fine, pretty silver dollars.

When Farmer Anderson brings along his thousand dollars worth of wheat, Mr. Jones buys it, paying him \$1,000—and he has \$1,000 left with which to buy the wheat of the next farmer that comes along.

This is free coinage. Some people are sure that all the farmers in the country are shouting for it.

We should see a good many strange things in this country if the silver people should have their way.

THE WAR DEPARTMENT has been obliged to issue a general order warning soldiers against burning their hands in the heat generated by firing the smokeless powder is twice as great as with the old rifle. Well, it does seem that everything that the present Administration touches burns its fingers.

A RECENT ISSUE of The Cleveland Leader says the new Tariff Law, the Tariff Law of the reformers which was to gladden the heart of the American farmer and faten the pocket-book of the American mechanic, has been in operation for six months.

The law is now old enough to be studied. It has been in the statute book long enough to show results.

Every American knows what the Democratic promise to repeal the McKinley Law brought upon the country. The promise has been kept. Now, what is the effect of the promise so kept?

The effect is wide and startling. It includes a new public debt, low wages and small profits. This can be said generally. Specifically it can be said that the manufacturers in England and on the Continent of Europe are daily increasing their sales in the United States. Goods are coming into American ports by the ship load. This is a good thing for the National Treasury, but it is a bad thing for American labor. A bar of iron made in England and sold in this country deprives some Americans of wages which are theirs by right.

The new law, therefore is not filling the pocket-book of the American workman but is emptying it. This is a fact that can be proved by Democratic figures set down in Washington and gathered by Democrats from Democratic customs officers.

The new law, the law of the burdened lifters, has been, we have said, in effect six months. During the eight months just past the American farmer has been gradually but surely squeezed out of the foreign markets with his staple products. He has lost a market for \$47,000,000 worth of his wheat and for \$20,000,000 worth of his corn. The price of cotton has fallen two and one-quarter cents a pound, and foreign sales show a decrease of \$10,000,000 sales.

The Democratic Tariff Law, therefore, has helped the foreigners but it hasn't helped any Americans but those who have been appointed to collect the income tax.

A NEW ASPECT.

Greytown May Be Bomarded by the English

For the Immediate Collection of the Demanded "Smart Money."

The United States Would Not Be Warranted in Interfering. President Wilson has left on his travels. "Smart money" could only look out.

WASHINGTON, April 17.—If Great Britain, as reported, considers Nicaragua's reply an unsatisfactory answer to her ultimatum, and should proceed to take immediate steps for the collection of the demanded "smart money" for the expulsion of Hinch, the Nicaraguan incident will immediately take a new aspect.

The United States has already been assured that no Nicaraguan port where American interests are important would be bombarded, but the question of Great Britain's attaching Nicaragua's custom receipts is still an open one, in which the United States, it is said at the department, has not yet made any representations.

The United States would not be warranted in interfering with Great Britain in the collection of legitimate debts, providing no injury was inflicted on the interests of the United States, which are recognized by all nations as paramount on the American isthmus, and especially in any country which included territory vital to the inter-oceanic transportation by canal or otherwise.

As to the measures which Great Britain might resort to to enforce payment of her claims against Nicaragua, short of bombarding Greytown, which is not a feasible step, it is said, would a blockade of Nicaragua be a possible effect, so as to prevent the vessels of that country from plying their trade until a settlement had been reached.

Great Britain could also take forcible possession of the customs duties and collect all duties from vessels in the country until the sum demanded had been paid.

There is good authority for the statement that Nicaragua, rather than resort to war with Great Britain, will probably pay the money demanded. She will, however, pay it under protest, and insist that it has been wrung from her arbitrarily and by force, and that it should be returned to her when she can not be understood as agreeing that the claim is a just one until it shall first have been passed upon by a board of arbitrators.

RANSOM IN RAPE.

WASHINGTON, April 17.—Officials take stock in a published statement that ex-senator Danahoe's appointment as minister to Mexico was illegal under the constitution because the compensation of the office was increased during his term of service. Although Senator Danahoe was "nominated" and confirmed during his term of service, it will be held that he was not "appointed" until he had received his commission, which was on March 5, when he had ceased to be a senator.

MANIPULATION DAY.

WASHINGTON, April 17.—Manipulation day was celebrated by the Negroes of the district Tuesday. The chief feature of the day was a parade in which the Negro militia and various societies took part. President Cleveland reviewed the procession from the porch of the white house. He raised his hat to the marshals of the parade and also saluted the American flag whenever it passed.

CHIEF MANAGER DEAD.

WASHINGTON, April 17.—Mr. Charles H. Mansur, assistant controller of the treasury department, and formerly a member of congress from Wisconsin, died at 7 o'clock Tuesday morning, at the National hotel. His death had been expected for about a week. Mr. Mansur's remains will be taken to Richmond, Mo., where the interment will take place. The funeral train left this city at 8:40 o'clock Tuesday afternoon.

A TALE FOR AILE.

LONDON, April 17.—About a month ago an advertisement appeared in a leading English paper to the effect that the prince's title was to be disposed of, on favorable terms, by lawful means, and with the consent of the government in North America, one concerned. It is said that of the twenty-two replies received in the mail of the newspaper not less than six bore the postage stamp of the United States.

A Queer Ruler.

ATLANTA, Ga., April 17.—Mrs. Ollie Nerli, 35 years of age, took a dose of poison and swallowed her false teeth at the same time Monday night. She died soon after. The swallowing of the teeth may have been an accident. She was a divorced woman.

West Virginia's Income Tax.

PANORAMA, W. Va., April 17.—Internal Revenue collector (Gilkinson) states that up to midnight, 1914, there had been made for income tax throughout the state and several deputies were still out. The total number will be expected to be about 10,000.

Smallpox at South Elkhorn, Ky.

LEXINGTON, Ky., April 17.—Smallpox was discovered Tuesday morning at South Elkhorn, in this county. The subject is a negro who has been working at High Bridge. He will be brought to the Lexington post office.

Deaths by Fire.

Marysville, Tenn., April 17.—P. Dunne has bought privately of O. Walbaum the brown oak Oakley, 3, by Sir Dixon—Miss Ann's. He is quite a promising three-year-old.

John W. Foster, wife of the ex-secretary of state, Tuesday received a dispatch from her husband, who is in London, advising her to the British peace officer, confirming the report that articles of peace had been signed between China and Japan. Mr. Foster will be home June 1.

DEVILISH DEEDS.

Evidence of a Startling Nature Against Durant—Light on the San Francisco Double Murder.

SAN FRANCISCO, April 17.—The Evening Bulletin is out with an extra saying: George R. King, organizer of the church here, where the horrible murder of Miss Williams and Miss Lamont was committed, made a statement to chief of Police Crowley late which tends to fix one crime at least on the murder of Miss Lamont—upon Durant.

King says that on April 3 (the day Miss Lamont was missed) he went into the church about 5 p. m. to practice on the organ. "I saw Durant there, much to my surprise. He came down from the organ loft in a highly excited and overheated condition. I asked him what was the matter, and he replied: 'I overcame by gas up there in the loft.' He was very weak and pale, and asked me to give him a glass of bromo seltzer. I know he was living up some electric contrivances about the church, and thought nothing strange about his going up in the loft."

The theory now is that Durant had just completed his fiendish task when seen by George King.

The report that Durant, the accused murderer, has broken down and is, stationed at the Zurich, Switzerland, showing the novel plan by which food and clothing are furnished to poor children in that country.

Public soup-houses.

The Republic of Switzerland Provides for the Needy.

WASHINGTON, April 17.—A report has been received at the department of state from Consul Eugene Germain, stationed at Zurich, Switzerland, showing the novel plan by which food and clothing are furnished to poor children in that country.

Public soup-houses are established at which workmen as well as poor travelers can obtain food nearly at cost.

The price for a portion of soup, enough to feed two persons, is fixed at two cents and a special rate of one and a quarter cents is made for pupils. These children who are too poor to buy food for themselves are supplied with food and clothing in this way, the total cost of the supplies being about \$10,000. No one, however, has been heard of, but many good results have been reported.

WOMAN BUTCHERED.

She Was Terribly Cut and Then Robbed at Henderson, Ky.

HENDERSON, Ky., April 17.—Monday evening two half-drunk Negroes, Shelton McElride and Neil Lewis, went to the cottage of Miss Maudie Taylor, on Upper Green street, and knowing she had a small sum of money, demanded that she produce it. She refused, and they assaulted her with knives, cutting her in twenty places, when she fell mortally wounded, shrieking for help.

After the butchery the assassins secured the coveted purse from the bosom of their victim's dress and fled. Accused by her cries, the neighbors entered the house and found the walls and furniture covered with blood. The police were soon on the spot and succeeded in finding and arresting the culprits whom they took to the county jail.

April Nineteen Protested For.

CHICAGO, April 17.—At a vestry meeting of Grace Episcopal church it was decided unanimously to give the retiring pastor, Rev. Clinton Locke, an annuity of \$2,500 a year and the use of the rectory as long as he may elect. The vestry also made provision for Mrs. Locke, providing she shall survive her husband.

Never Recovered From the Shock.

LITTLE ROCK, Ark., April 17.—Mrs. Mary E. McCreary, one of the earliest settlers of Plummerville, Conway county, is dead, aged 68 years. It was in the Little Rock city of John W. Clayton was murdered, and Mrs. McCreary suffered a terrible shock by that tragedy from which she never fully recovered.

Petroleum in Texas.

SAN ANTONIO, Tex., April 17.—An article has been made of the oil which was discovered a few days ago in an artesian well that was being drilled within the city limits. The oil proves to be fine crude petroleum. The well will produce a large quantity of oil per day. Other wells will be put down immediately.

Oil Advanced Abroad.

LONDON, April 17.—The English manager of the Standard Oil Co., when he left Tuesday regarding the advance in the price of petroleum in the United States, and the situation here, said that the price of oil in England had been advanced to correspond with the price in America.

Will Have a Hearing.

CHICAGO, April 17.—Judge Shoveller Tuesday morning vacated the restraining order against Niede, Cooper & Co. a hearing on their income tax return. A hearing on the application was set for two weeks from Tuesday.

Nicaragua's Answer Rejected.

LONDON, April 17.—The Globe Tuesday morning gave Great Britain the answer to the Nicaraguan government to the British ultimatum, and will take immediate steps to order her demands.

Prince Alfred of Sax-Coburg (Gotha, eldest son and heir of the duke of Sax-Coburg-Gotha (more generally known as the duke of Edinburgh), is likely to be betrothed to the young queen, Wilhelmina of Holland. The young queen was born on The Hague, August 3, 1868, and the young prince was born in London on the 10th of July, 1894.

The selection of Clifford Park as the site for Baltimore's Centennial Exposition two years hence was formally decided.

Easter Opening

Easter Opening means a magnificent spring start. Nothing finer will be seen this spring than our grand Easter opening of footwear. There's something to open in a stock like ours, and those who see it are bound to open their eyes with mingled surprise and satisfaction. Everything for the season is out, and everything out for the season is in our display. Here are interesting foot notes, bright as Easter, pleasing as spring, giving promise of long wear and guarantee of full value and presenting a complete assortment of shoes for men, women's and children's wear. An Easter duty to examine our store. You will be pleased and we will be pleased to show you these marvels of beauty and cheapness.

OFFICE AND RESIDENCE—Third street, opposite the Courthouse.

The Monk!

By MATTHEW G. LEWIS, (MONK LEWIS)

Mr. Lewis was a member of the Bowdoin Association, and he became so popular in England a hundred years ago that it passed for him the title of "Monk Lewis."

It is a fine piece of classic composition, and after being out of print for many years it has been republished from the original text.

It is far superior to "Maria Monk" and books of that character.

CRAZE IN OIL.

Where Will It End is Now the Question.

May Options Jumped to \$2.54 Per Barrel at Pittsburgh.

First Certificates Bought \$2.50.—The Market Slightly Recovered Later.—The Standard Oil Co. News.—The May Oil at Almost Any Price.

PITTSBURGH, April 17.—Oil made another big jump toward the \$3 mark Tuesday. On the exchange the first bid was \$2.40, and the first transaction in certificate oil was at \$2.50. After this the market reacted, and sales were made at \$2.38. The market again strengthened, and oil was bid up to \$2.47, where another sale was made. At this point the holders of certificates hesitated, and the market remained firm until near the close, when an advance of seven cents was recorded, sales being made at \$2.54 for the N.Y. option.

The fact that the Standard Oil Co. had advanced credit liabilities twenty-five cents from Tuesday's price of \$2 to \$2.25, would naturally lead to the conclusion that the company is anxious for oil at almost any price. This was a great stimulant to the speculative market, and the price at the exchange opened up fifteen cents higher than Tuesday's closing price, or at \$2.40 bid. The first holder of a certificate refused to part with the commodity if he had received \$2.50 for his holdings.

Where will this advance stop and who is making money, or who is getting hurt, is the question that arises. The Standard has contracted for refined oil at a figure that they could not possibly fill and put on the market at the price now quoted. Others, however, well informed, say the Standard bought plenty of oil around \$1.50 and below, and that the contracts they have to fill now they can do with crude bought nearly two dollars lower than the present price.

The independent producers and refiners, however, must by this time feel the advance in petroleum, from the fact that the time of the Standard's holdings on April 1 only aggregated 90,000 barrels. When it is taken into consideration that the daily runs of the two independent pipelines do not average over 6,000 barrels daily, while their shipments were collected at a price that the independent people is becoming very dear.

Many believe the Standard is out after the two independent pipeline companies. The result of the deal with the Venture Oil Co. which closed Monday, and which came to the Standard, the major portion of the production in the Sistersville field, will enable the company to fulfill its contracts.

As this shuts the independent people out of quite a lot of available territory, it will be seen that to fulfill their contracts to the Standard, the price named by the Standard inside the new territory is developed.

Should the price of oil become so high that the independent people could not fill contracts for their foreign customers, it would give the Standard, virtually, the entire oil market in the United States and that part of the foreign countries where they sell their product. It would also mean the closing of the only trunk line auto-oilistic to the Standard, whose outlet was at Memphis, Tenn., and that would leave the Standard in possession of the only direct line to the seaboard. While this rapid advance in crude petroleum continues, producers who intend to work the Standard and independent pipelines are reaping the long-looked-for harvest, that they have waited for for many years, and the companies have been in territory heretofore unexplored.

Escaped Train Robber Caught.—HOMERACK, N. Y., April 17.—Train robber Oliver C. Perry was arrested early Tuesday morning at Weehawken by Detective Clifford at the New York City station. He denied his identity until about 1 o'clock, when he was confessed that he was the fugitive Perry. He will be detained here until the New York authorities call for him. Before surrendering he gave the police a fight, and was scratched all about the face and arms.

Negotiations Abandoned.—MADRID, April 17.—The Spanish government has abandoned negotiations looking toward the purchase of the cruiser recently built at Kiel for China, which was not delivered, owing to the fact that the purchase money was not forthcoming. The builder of the cruiser demands £50,000 for his vessel, and this figure the Spanish authorities consider excessive.

Water Famine at Pittsburgh.—PITTSBURGH, April 17.—As a result of the break in the old main water pipe from the Brilliant pumping station of the Pittsburgh Water Works, the city suffered Tuesday from a water famine. Many important business houses, industries and homes were without water. The city water works have been unable to get the broken pipe fixed.

Income Tax Ruling.—LEXINGTON, Ky., April 17.—The commissioner of internal revenue has sustained Deputy Collector of Lexington in his ruling that income tax must be paid on winnings from races, poker, roulette, etc. The commissioner will permit deduction on account of money lost at gaming.

One of the Heirs to Over \$500,000.—HUMPHRIS, N. D., April 17.—The wife of Dr. Thomas H. Humphris, who has been advised that she is one of the nine heirs to a fortune of over \$500,000 left by a relative in Buenos Ayres.

The Japanese Edict.—TIENTSIN, April 17.—An imperial edict has been issued authorizing Li Hung Chang to sign the terms of peace in accordance with the Japanese ultimatum.

A PHYSICIAN'S DEED.

Takes Poison and Then Cuts His Throat in His Mother's Presence.

CUTACON, April 17.—Dr. J. Nelsen, a prominent physician, who had, until six months ago, enjoyed a lucrative practice, made a desperate and probably successful attempt to kill himself Tuesday morning at his home, 39 May street, in the presence of his mother. She was horrified at the sight of her son in agony on his bed from the effects of taking a dose of chloral. While the mother was trying to find some antidote, Dr. Nelsen refused to let her near him and dived the blade across his throat before Mrs. Nelsen could stop him. She sprang on him and wrested the weapon from his grasp before he could inflict another gash. Breaking away from his mother, the doctor rushed into the kitchen, where he seized a knife and again slashed his throat. Then he ran back to his room, and, turning on the gas, tried to keep his frantic mother out, but the loss of blood and the chloral made him unconscious. He was removed to the hospital, where, in consequence of loss of blood, he died.

Runaway Girl Captured.—UPPER SANDUSKY, O., April 17.—A very charming runaway girl, who had been running away from her home for some time, was captured by the authorities from Lima. She was on the east-bound passenger train from Pittsburgh. Her father, Wayne C. Chingolo, and the claim she was going to Marietta. She says her name is Vernice Waller, and her home Port Republic, O. She refuses to talk with reporters, but to Mrs. Kuehl, wife of the sheriff, she said she left home because she was tired of her father's treatment. She was captured at midnight.

Brutal Traps.—ELMIRA, O., April 17.—A gang of thirty traps in a freight car assaulted two of their robbers at the line of the Standard has contracted for refined oil at a figure that they could not possibly fill and put on the market at the price now quoted. Others, however, well informed, say the Standard bought plenty of oil around \$1.50 and below, and that the contracts they have to fill now they can do with crude bought nearly two dollars lower than the present price.

The independent producers and refiners, however, must by this time feel the advance in petroleum, from the fact that the time of the Standard's holdings on April 1 only aggregated 90,000 barrels. When it is taken into consideration that the daily runs of the two independent pipelines do not average over 6,000 barrels daily, while their shipments were collected at a price that the independent people is becoming very dear.

Many believe the Standard is out after the two independent pipeline companies. The result of the deal with the Venture Oil Co. which closed Monday, and which came to the Standard, the major portion of the production in the Sistersville field, will enable the company to fulfill its contracts.

As this shuts the independent people out of quite a lot of available territory, it will be seen that to fulfill their contracts to the Standard, the price named by the Standard inside the new territory is developed.

Should the price of oil become so high that the independent people could not fill contracts for their foreign customers, it would give the Standard, virtually, the entire oil market in the United States and that part of the foreign countries where they sell their product. It would also mean the closing of the only trunk line auto-oilistic to the Standard, whose outlet was at Memphis, Tenn., and that would leave the Standard in possession of the only direct line to the seaboard. While this rapid advance in crude petroleum continues, producers who intend to work the Standard and independent pipelines are reaping the long-looked-for harvest, that they have waited for for many years, and the companies have been in territory heretofore unexplored.

A NEW FLUID.

Claimed to Be of Marvelous Power, Discovered.

Said to Cure Diphtheria, Scarlet Fever, Measles and Scarcities.

It is Assumed That Nuclein is One of the Components Present in Antitoxins, and That It is the Natural Food of the Blood Tissues.

NEW YORK, April 17.—Certain physicians of the German Dispensary, at No. 234 West Forty-second street, have of late monopolized in certain localities with a certain fluid, and in their opinion have achieved marvelous effects. It is claimed nuclein is one of the components present in antitoxins, and is the natural food of blood tissues. It is due to nuclein that antitoxins possess their power. The theory is that antitoxins, that the latter sometimes proved fatal.

Exactly what nuclein is, and how it has been prepared, is not given. It is said that Dr. Charles McClintock and Prof. Vaughn, about a year ago, while experimenting in their laboratory, discovered fluid, in the manufacture of blood chemicals represented by 29 parts of carbon, 49 parts of hydrogen, 6 parts of phosphorus and 32 parts of oxygen. This was nuclein. By the inoculation of guinea pigs with toxin they found nuclein possessed wonderful restorative powers.

The two physicians here, Drs. Beyer and Jacobson, took the subject up. They found it to a greater extent in the blood cells of healthy persons, and as it was also an ingredient of antitoxins, it was the real food upon which the blood tissues fed, and as such was nature's own antitoxin. To change this theory into a fact it was necessary to treat and take notes of four cases of every stage of age and physical conditions.

It was first tried on a girl 4 years old, who had diphtheria. The temperature slowly rose, followed by a sudden drop. The pulse became normal, and in three days the patient showed no sign of disease. These were followed by two other cases. Nuclein was then employed as a fortifier against contagious diseases, and in the treatment of diphtheria, scarlet fever, measles and scarlatina. In this city with nuclein only nine patients died, it is said, while in New York, where it has not yet been manufactured from pure chemical elements in combination in a laboratory. It is now used from yeast, which is purified through analysis from blood serum.

ANOTHER SHORTAGE.—Crunket Sale of Certain Items. Report of Experts Made.

NEW YORK, April 17.—The report of the wheat trade experts for the week ending during which the wheat and flour market of the country was complicated with Judge Shawalter's report. The wheat market was in a state of confusion, and the report shows a deficiency of about 10,000,000 in the last year.

The discrepancies for 1916-17 include the large sum alleged to have been diverted in the sale of wheat in the United States in a bill filed last week.

The Short Cattle Supply.—GRANDTOWN, Tex., April 17.—The first shipment of short cattle for the week will be shipped from here Wednesday, and there will be no more cattle to ship this summer on account of drought. The supply of stock cattle on hand to be sent to winter on cottonseed meal is 25 percent less than last year. Prominent cattle men do not attribute the rise in beef to any combination, but to the supply of cattle, which has fallen off greatly during the past two years on account of the drought.

Season Times a Biligami.—MIDDELBURG, Ky., April 17.—William Headrick, wanted in Ohio, North Carolina, Tennessee and Kentucky, for bigamy, was arrested on the charge of horse stealing and looked in the jail here. Seven deserted wives are on his track. Headrick would travel about the country and when he would find a woman with money would marry her. As soon as he could get the money in his possession he would desert her.

Indiana Convicts.—LA PORTE, Ind., April 17.—Lieut. Gov. Vye has appointed Senators Healey, of St. Joseph; F. E. Ellison, of Elletts; and C. D. Duncan, of Monroe, Brown and Bartholomew counties, members of a special committee to investigate the feasibility of abolishing the convict labor system by employing the convicts of the two state penitentiaries on the public highways.

Was Mrs. Forsyth a Victim?—SAN FRANCISCO, April 17.—George W. Forsyth, husband of Mrs. Ella Forsyth, who was killed by a train, is suspected of making away with, positively denies that he ever visited San Francisco, and that he was in contact with her. He believes that she was drowned in San Francisco bay.

Miners Call a Convention.—PITTSBURGH, April 17.—The miners' union of the Pittsburgh district has issued a call for a delegate convention to be held on Friday, April 19, to consider the status of the present strike. The union is in a state of confusion, and the miners are in a state of confusion.

The Defender.—NEW YORK, April 17.—The Herald Tribune, published at the New York office of the Vanderbilt-Heilbrunn-Morgan syndicate, who have undertaken to defend the American cup, saying they would like to have the new prize money, but not to have the "Defender" published at the Herald Tribune.

CONDENSED NEWS

Gathered From All Parts of the Country by Telegraph.

Rev. George W. Clark fell dead of an aneurism at Jacksonville, La. A dispatch from Tokyo to the General News says the Chinese war industry will be made in Japan. Mrs. Mary Nicholas died at her home in Brazil, Ind., at the extreme age of 108 years. She had lived in Brazil seventy-five years.

Hon. Leverett Saltonstall, collector of the port of Boston during President Cleveland's first administration, and a member of the Cleveland administration, died at his home in Cleveland.

A two-year-old child of Oscar Linn, of Wells county, Ind., drank part of a bottle of carbolic acid and was terribly injured. It will recover.

The law authorizing the R. O. A. of Cincinnati, to issue \$100,000 bonds to pay delinquent taxes was declared unconstitutional by the Ohio supreme court Tuesday.
